Bird Checklist for US Army Garrison Alaska: Donnelly Training Area

species is disseminated by season.

Donnelly Training Area (DTA) occupies 650,000 acres of the middle Tanana River Basin. DTA supports a complex mosaic of ecosystems and is composed of many acres of wetlands, kettle lakes, alpine and tundra habitats. Parts of DTA were designated as an Important Bird Area of World significance by the IUCN for the large numbers of trumpeter swans and sandhill cranes that use the area.

Seasonal abundance on Donnellt Training Area, Alaska is described as follows

C - Common (certain to be seen in suitable habitat) widely distributed, and relatively easy to detect

- Uncommon (present but not certain to be seen; or localy distributed

R - Rare Present annually in very low numbers or locally distributed.

Infrequently encountered, or seen only a few times annually. proximity but birds are observed during the breeding season. no - Not documented as breeding on DTA or close proximity.

Breeding status

yes - Documented as breeding on DTA

probable - Not documented as breeding on DTA but has been

documented as breeding in close proximity to DTA.

Possible - Not documented as breeding on DTA or close

O - Occasional (seen only a few times in a five year period.

o - spring - March to May	Su - Summer - June to July
a -Fall - August to October	Wi - Winter - November to February

This document lists all species which could be observed on Ft Wainwright, Alaska

Donnelly Training Area Lands at some time during the year. The adundance of each
